## Education

List the relevant advanced courses taken (courses typically taken in the 3rd year of college or later) in chronological order in the fields of Economics, Mathematics, Statistics and Other Quantitative fields (e.g. Engineering). Choose courses that best represent your background, ideally limiting each field to five courses and listing no more than 20 courses total. In the fourth column use " $U$ " for undergraduate and " $G$ " for graduate. In the sixth column list the author of the book followed by its title. In the seventh column enter your grade as it appears on your transcript. Use the last column to add any other relevant information.
