

Charles A. Caramello Distinguished Dissertation Award (2021)

The Charles A. Caramello Distinguished Dissertation Award recognizes original work that makes an unusually significant contribution to the discipline. The eleventh competition will occur in Spring 2021. We invite nominations from colleges for Ph.D. dissertations defended in the calendar year 2020.

Applications are accepted within four broad disciplinary areas: 1) Mathematics, Physical Sciences, and Engineering; 2) Social Sciences; 3) Humanities and Fine Arts; and 4) Biological and Life Sciences. The Council of Graduate Schools uses these categories for the annual CGS/ProQuest Distinguished Dissertation Awards. (For definitions of these disciplinary categories, please see Appendix A.)

Recipients of the Charles A. Caramello Distinguished Dissertation Award will receive an honorarium of \$1000 and may be nominated by the University for the CGS/ProQuest Distinguished Dissertation Award.

Up to four Awards will be given each year, one in each of the four broad disciplinary areas. Both methodological and substantive quality will be judged.

Nominations will be made by colleges to the Graduate School.

NOMINATION DEADLINE: Wednesday, February 24, 2021, by 12:00 noon.

ELIGIBILITY INFORMATION

To be eligible for this competition, a dissertation must have been defended in calendar year 2020. Eligible candidates will have graduated in May 2020, August 2020, or December 2020. Also, students who defended in 2020, but will graduate in May 2021 are eligible.

Students, please contact your department and college for more information about the nomination process.

Programs seeking to make a nomination must consult with their college/school about their internal nomination process and deadlines.

NOMINATION INSTRUCTIONS

Each college may nominate at least one dissertation. Colleges that award more than 25 Ph.D.s annually (averaged over the past three years) may nominate an additional dissertation for each 25 Ph.D.s awarded, as reported by IRPA. (Nomination allotments can be found on Appendix B.)

Each dissertation must meet the eligibility requirement and must be written by a Ph.D. student whose home department is in the college making the nomination.

The college may choose the disciplinary category most appropriate for each nominated dissertation.

Distinguished Dissertation Award, Continued

NOMINATION PACKAGE

Nomination packages must be submitted to apps.gradschool.umd.edu/GSAwardsSystem/ in two PDF files.

The first PDF file is the nomination package. Please include these five elements:

1. a Caramello Distinguished Dissertation Award Cover Sheet (*found on page 4, or [online](#)*);
2. a letter of recommendation from the dissertation supervisor that evaluates the significance and quality of the dissertation;
3. a letter of nomination from the College. The College letter should include substantive contributions to the package and not simply cover or summarize the dissertation supervisor's letter.
4. a 10-page, double-spaced abstract of the dissertation, written by the candidate for this competition. This is typically in addition to the abstract that is included in the dissertation.
 - The abstract should be written by the nominee and it should be written for a non-specialist audience.
 - Each page of the abstract should be numbered and bear the name of the nominee.
 - Appendices containing non-textual material, such as charts or tables, may be included in addition to the 10 pages; and
5. the nominee's brief C.V. (4 page maximum)

The second PDF file is the whole dissertation in PDF form.

SELECTION

The dissertations nominated for the Charles A. Caramello Distinguished Dissertation Award will be evaluated, and award recipients selected, by a multi-disciplinary, campus-level Selection Committee. A Distinguished University Professor will Chair the Selection Committee.

Due to the interdisciplinary nature of some dissertations, the selection committee may move a dissertation from one of the four disciplinary areas to another.

The Committee expects the 10-page abstract to be written for a non-specialist audience.

CONTACT

Please direct any questions to Robyn Kotzker, Program Director for the Office of Funding Opportunities (rkotzker@umd.edu, 301.405.0281.)

APPENDIX A

Council of Graduate Schools Definitions for Dissertation Award Categories*

Mathematics, Physical Sciences and Engineering: mathematics, statistics, computer sciences, data processing, systems analysis, chemistry, earth sciences, physics, geology, meteorology, astronomy, metallurgy, geophysics, pharmaceutical chemistry; aeronautical, architectural, biomedical, ceramic, chemical, civil, and electrical engineering sciences; environmental health engineering; geological, mechanical, mining, nuclear, and petroleum engineering. (For purposes of this competition, engineering technologies are not included.)

Social Sciences: agricultural economics, geography, anthropology, archaeology, economics, education, sociology, government (political science), demography, and psychology. (For purposes of this competition, history is considered with the humanities.)

Humanities and Fine Arts: history; philosophy; language; linguistics; literature; archaeology; jurisprudence; the history, theory and criticism of the arts; ethics; comparative religion; and those aspects of the social sciences that employ historical or philosophical approaches.

Biological and Life Sciences: biology; botany; zoology; ecology; embryology; entomology; genetics; nutrition; plant pathology; plant physiology; anatomy; biochemistry; biophysics; microbiology; pathology; pharmacology; physiology; and related fields. Also included are agriculture, forestry, and related fields.

* *These lists are not all-inclusive.*

APPENDIX B

Nomination Allotments by College

Each college may nominate at least one dissertation. Colleges that award more than 25 PhDs annually (averaged over the past three years) may nominate an additional dissertation for each 25 PhDs awarded, as reported by IRPA.
