Register for ARHU789A in Winter 2018

This 1-credit practicum is a hands-on seminar in how to build a course from the ground up. Graduate students will design an original 300-level or higher course based on their own area of expertise. We will work through course conceptualization, objectives and learning outcomes planning, materials gathering, syllabus writing, assessment policy and procedures, and lesson planning. A supportive, collaborative environment is key to a successful process and product, so we will actively use peer feedback throughout the course.

Building Future Faculty Program at NC State University Accepting Applications for 2018 - Application Deadline 11/12/17

Upcoming workshops include:

- [Effective Presentations & Lectures](#), 12/6/17, 12:00-1:30 PM

Stay on Track with YOUR Individual Development Plan!

It is important to clarify the type of work you intend to do after earning your doctorate as early as possible. In an IDP you map out when and how you plan to acquire the skills and experiences to be a highly competitive candidate for your intended career path. Examples of printable IDP forms ([University of Wisconsin](#) and [UC-Irvine](#) are available on the Professional and Career Development section of the Graduate School website. Consider scheduling a career advising appointment to discuss your career goals and possible action items that you can build into your Individual Development Plan (IDP).

[ImaginePhD](#), is a free online career exploration and planning tool for PhD students and postdoctoral scholars in the humanities and social sciences. Use it to explore 16 job families, assess your interests, skills and values, and to create your Individual Development Plan.

[myIDP](#)

STEM PhDs can use this tool to explore science careers outside of academia and create an Individual Development Plan.

ChemIDP™
A career planning tool for chemical scientists

ChemIDP is an Individual Development Plan tool designed specifically for graduate students and postdoctoral scholars in the chemical sciences.

Through immersive, self-paced activities, users identify career goals, determine specific skills needed for success, and develop a plan to achieve their professional goals. ChemIDP helps you track your progress and provides tips and strategies for realizing your goals. [Learn more](#)

Thinking about non-academic careers? The University of Maryland subscribes to a resource that demystifies non-academic careers and reveals many professions that can utilize the skills you are developing in graduate school. [Learn more](#)
